

Introducing the Yumexz Solar Direct Cooling System

We are pleased to introduce the Yumexz Solar Direct Cooling System, a revolutionary technology that harnesses the power of the sun to provide efficient and cost-effective cooling for homes and offices. This innovative system converts sunlight directly into electricity to power a cooling compressor, eliminating the need for expensive batteries and reducing energy costs by up to 5 times compared to traditional government electricity rates.

JA by John Ogbeche

How the Yumexz Solar Direct Cooling System Works

- 1 Sunlight to Electricity**

The Yumexz Solar Direct Cooling System uses a hybrid photovoltaic system to convert sunlight into electricity, which powers a compressor to cool homes and offices during the day.
- 2 Excess Energy Storage**

The system generates more energy than needed to cool the building, and the excess energy is stored as ice in an "ice battery" for later use.
- 3 Nighttime Cooling**

At night, when the sun is not shining, the stored ice is used to cool the building, providing 24/7 cooling without the need for traditional energy sources.

Benefits of the Yumexz Solar Direct Cooling System

Cost-Effective

The Yumexz Solar Direct Cooling System reduces energy costs by up to 5 times compared to traditional government electricity rates, making it a cost-effective solution for home and business owners.

Highly Efficient

With an efficiency rate of 99%, the system minimizes energy waste and maximizes cooling output, providing reliable and consistent cooling.

Environmentally Friendly

The system uses renewable energy from the sun, reducing carbon emissions and promoting a cleaner environment. It's a sustainable cooling solution for the future.

Reliable 24/7 Cooling

1 Reliable Operation

The Yumexz Solar Direct Cooling System provides 24/7 cooling, even during power outages or grid failures, ensuring your comfort and peace of mind.

2 Easy Installation

Our team of experts will work with you to design and install the system, ensuring a seamless and efficient process that integrates seamlessly with your home or office.

3 Minimal Maintenance

The system is designed for low-maintenance operation, with minimal upkeep required to keep it running at peak performance.

Revolutionize Your Cooling with the Yumexz Solar Direct Cooling System

A Game-Changer in Cooling

The Yumexz Solar Direct Cooling System is a revolutionary solution that combines cutting-edge technology, impressive efficiency, and unparalleled cost-effectiveness to transform the way you cool your home or office.

Reduce Your Energy Costs

By harnessing the power of the sun, the Yumexz system can reduce your energy costs by up to 5 times compared to traditional government electricity rates, making it a smart and sustainable choice for your cooling needs.

Embrace a Greener Future

With its reliance on renewable solar energy and reduced carbon emissions, the Yumexz Solar Direct Cooling System is a step towards a more environmentally-friendly future, helping you do your part in creating a cleaner, more sustainable world.

Enjoy Uninterrupted Comfort

Regardless of power outages or grid failures, the Yumexz system ensures your home or office remains cool and comfortable 24/7, providing a reliable and resilient cooling solution you can depend on.
